

Tempus

Development of Embedded System Courses with implementation of
Innovative Virtual approaches for integration of Research,
Education and Production in UA, GE, AM

Presentation of P12 – “Yerevan Telecommunication Research Institute” CJSC YeTRI

Tbilisi Technical University
27-29 October 2015

Mher Markosyan

Tempus

DesIRE

Founded in 1978
as Moscow
Scientific
Research
Institute of Radio
Communication
Specialized in the field of means and units of satellite
communication.

Since 1989 is an independent institute and works in the field of:

- design and manufacturing of communication systems and units ,
- radio technical systems for different purposes (Hardware & Software);
- Software.

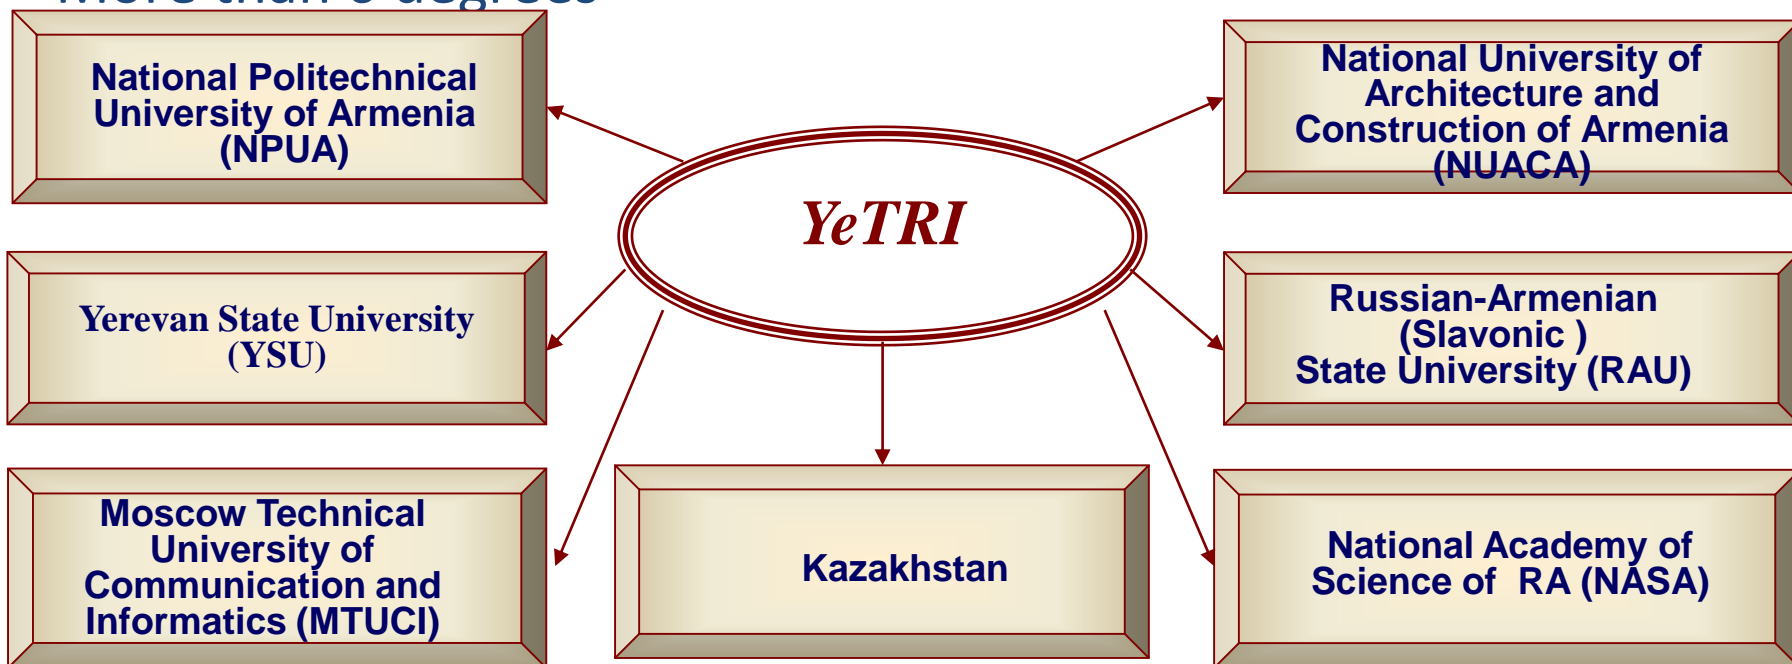

YeTRI

More than 400 students (from YSUAC, RAU, NASA, SEUA, YSU)

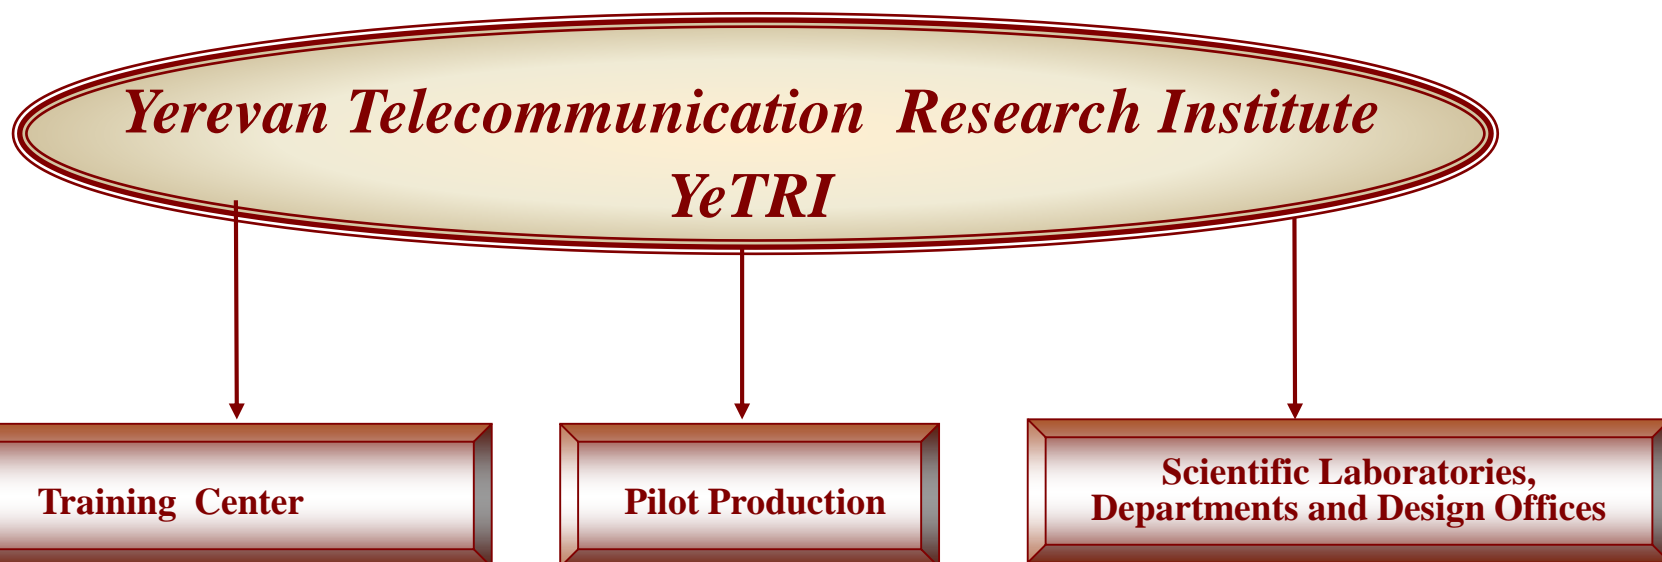

More than 130 staff members (30 in the field of trainings, 6 with scientific degrees, 3 with ranks of professors)

More than 6 degrees

Technological Forces

GSM, 3G Repeater

Radio system for simultaneous translation

VHF, UHF repeater

Internet-TFOP connector

Jammer GSM

TV FM Transmitters

RF PA

Radio modem

GSM Duplexer

Band pass filters (VHF, UHF, RF, MW)

Analogue and digital
conference system

Loud-speaking
communication system

Mini ATES-8/2
Multichannel manual
switchboard of phone lines

Mini ATES up to 20 subscribers

Design and manufacturing of microcircuits and micro assembly by order

Acousto-optic convolver

Module of correlation processing

Crystal oscillator of reference frequency

Voltage controlled oscillator (VCO)

Delay lines

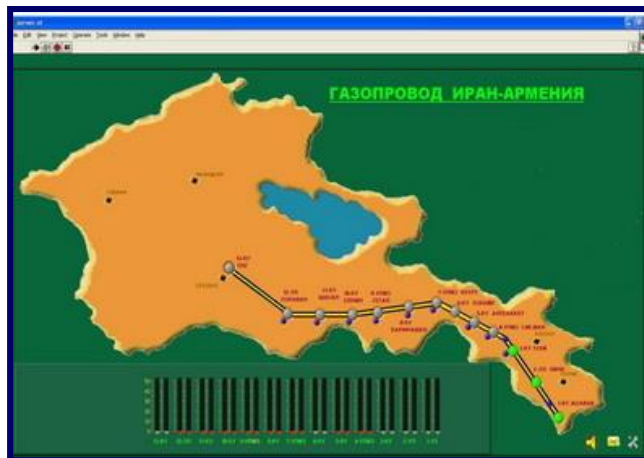

Micro-strip directional couplers

Circuit power dividers/combiners

SCADA system

System of call registration

Biometric system of staff registration

"PIANO" SYSTEM

Risking the information-you risk business.
The reliable space is vital.

Automated control system by technological processes

Controller for technological processes

GPRS controller

VSWR sensor for P2-102 device

Inclinometer

Detector head for P2-102 measuring device

Temperature and pressure sensors

GPRS modems with controller

Antennas and rotary support

Tempus

DesIRE

Enterprises and Companies

Local Project Team

- Laboratory of radio devices, Laboratory of microprocessors & digital technology
 - specialized in embedded hardware and software development
 - analogue and digital system design
- Department of Mechanical Engineering
 - Mechanical and structural design and behavior.

Методические указания

DesIRE

At the YeTRI the following curricula have been developed for the *DEPARTMENT OF MANAGEMENT AND TECHNOLOGY*

- Microcontrollers
- Hardware for Embedded Systems
- “C” for Embedded Systems
- Embedded Operating System
- ECAD electronic design
- Digital Electronics

Activities Carried out

- Collaboration was set among partner universities
- Dissemination meetings with partner universities were held
- Support of Retraining within the scope of Desire Project
- Preparation of a handbook on

Activities Carried out

- Regular Disseminations within the scope of DeSIRE Project were held in Yerevan
- On July 15, 2014 Dissemination of DeSIRE Project was held in Sevan Town, Armenia.
